Leading Dubai Construction Company approves use of Evercrete DPS on luxurious residential project

Villa in the Emirates Hills

Arabtec Construction LLC, one of Dubai's largest construction companies, has approved the use of Evercrete Deep Penetrating Sealer (DPS) on their prestigious "Emirates Hills" residential project.

Arabtec, most notably known for their interior fit-out work on many of Dubai's luxury hotels including Burj Al Arab, Jumeirah Beach Hotel, Al Bustan Rotana Hotel, Ritz Carlton and The Grand Hyatt Hotel, will use Evercrete DPS for anti-carbonation, waterproofing and as a concrete preserver.

Evercrete DPS will initially be used on a 40,000 square foot residence in Emirates Hills, one of the largest villas in the development. By using one product to achieve several objectives, the owner of the villa has made a significant cost saving, while protecting their investment against carbonation and chloride ingress.

Evercrete DPS extends the lifetime of concrete structures by protecting them against the elements such as rain, salts, oils and chemicals which all wear down the integrity of the concrete over years, leading to unsightly stained surfaces and gradual structural decay. Evercrete DPS is an environmentally friendly, non-toxic, non-flammable, odorless, clear, water-soluble liquid compound, which is safe and easy to use. It outlasts and outperforms every other sealant on the market today.

Applying DPS in the Villa
